

Are you looking for a way to learn faster and better?

IntellADAPT's adaptive online learning software and headband can maximize your learning performance!

How it works:

1. Student puts on the intellADAPT headband
2. Student takes hour-long course
3. Learning system uses brainwave analytics from headband to determine the best learning strategy for student
4. Student continues learning with the best learning strategy, significantly improving student performance

Experimental results demonstrate that the intellADAPT headband and learning software can improve learning performance dramatically.

1. Learning strategy selection was statistically found to be the most important factor for the academic success of a student.
2. In three 25 minute sessions the intellADAPT headband is 72% likely to have accurately found the correct learning strategy.
